General Guide to ease -	Fitted	Semi - Fitted	Loose - Fitted
	0-3" (0 - 8cm)	4"- 6" (10 - 15.5cm)	7" + (18cm +)

NOTE: I aim to measure at least one size, usually a Size M. Generally speaking the difference between sizes is 2" (5cm) in width and 3/8" (1cm) in length. The length of the dress is calculated for the height of 5 feet 8 inches (173cm). To lengthen or shorten you're fit and flare dress then this is done at the hem line on the pattern.

Ease Key

How much ease is in your garment? Compare the finished garment measurements to your body measurements to determine the amount of ease.

The difference between measurements is the actual amount of ease the pattern has. With this information, you can double check your pattern's ease allowance, ie. How loose or tight it will be on your body.
